

Women Survivors Support Program – Annual Report 2025/2026

Executive Summary

The Women Survivors Support Program was implemented to provide protection, psychosocial support, awareness, skills development, and referral services to women and girls affected by violence. The program focused on creating a safe and supportive environment where survivors could access appropriate services and begin rebuilding their lives.

Major Activities

- Conducted community awareness sessions.
- Provided psychosocial support and referrals.
- Connected survivors with appropriate health and legal services.
- Conducted skills-development and livelihood training.
- Organized women's empowerment activities.
- Strengthened community-based protection and referral networks.

Key Achievements

- 250 women and girls participated in awareness activities.
- 100 survivors received support or referrals.
- 60 women participated in skills-development training.
- 35 women received livelihood or entrepreneurship support.
- 12 community awareness sessions were conducted.
- Partnerships were strengthened with local service providers.

Challenges

The program faced several challenges, including limited financial resources, difficulties reaching women in remote communities, lack of awareness about available services, and social stigma affecting survivors.

Recommendations

- Increase funding for survivor support programs.
- Expand psychosocial and legal referral services.
- Strengthen livelihood and entrepreneurship programs.
- Increase community awareness and prevention activities.
- Improve coordination among organizations providing survivor services.

Conclusion

The program made important progress in supporting women and girls affected by violence. Continued investment in protection, psychosocial support, economic empowerment, and community awareness will be important for achieving sustainable outcomes.
